

## The New World Order time for the reset?

The time for the reset has almost arrived. The “man behind the curtain” or the “hidden hand” is almost ready to be revealed. They have nearly fully propagandized and seduced the masses (at least those who can be hypnotized) now all that is required is one more layer of terror and people will be begging for “protection” (repression). They should be congratulated as it is quite an achievement for psyops to have the masses beg for enslavement.

That we are almost ready for the “great reset” has been signalled by the outgoing Bank of England Governor Mark Carney.<sup>1</sup> It is often true that when people leave a position, they feel free to speak candidly. Carney is a globalist (ex- Goldman Sachs) central banker, all Central Bankers are globalists. In case you have not noticed, we do not live in a purely “capitalist” system otherwise how can companies continue running that make no profits? We live in a command economy run by Central Banks and corporate monopolies.

## What went wrong?

Carney gives an over simplistic assessment of how we got into this mess (and he entirely leaves out the GFC and the neo-liberal economics that caused it). Later, the article will analyse what Carney said in some depth. For now, we will attempt to grasp the problem by trying to understand how we got here. The following observation by Carney is interesting;

As well as coming at a domestic high cost to EMEs, this vast accumulation of safe assets has pushed down the global equilibrium interest rate – the rate that central banks must deliver in order to balance demand with supply and so achieve stable inflation [p.8]

Here then is the crux of the problem (or at least one of them) as Emerging Market Economies (EMEs) have accumulated vast reserves of reasonably liquid “safe assets” (think here US dollars or their substitute.... usually Treasuries.... China has 1.3 Trillion in reserves). They have done this to cushion against external “shocks” (such as the GFC). Countries that have such large reserves can use them to help adjust the value of their currencies etc when they need. The problem is that the Central Banks created so much new money through QE that much of

<sup>1</sup> The Growing Challenges for Monetary Policy in the current International Monetary and Financial System  
Speech given by Mark Carney, Governor of the Bank of England Jackson Hole Symposium 2019, 23 August 2019

it flowed to reserves outside the USA. Therefore “cutting” interest rates will not help “stimulate” economies as much as they wish because they already have piles and piles of money (actually, zeros and ones) in their vaults (computer screens) and the banks and businesses have stopped investing. Just use easy money and cheap debt to buy-back your own shares and pay your shareholders a big dividend and yourself a fat salary. Don’t worry about the workers or the fact that your factory is falling apart!

You see, the problem is that the US dollar is the reserve currency (petrodollar) and many dollars are held by other countries as most trade takes place in dollars (US dollars not *Zimbabwean* dollars). These off-shore dollars are called the **Euro-dollar**. Alhambra Investments has an interesting analysis of the “Euro-dollar”<sup>2</sup> – the take away point is that Federal Reserve interest rates has little, or no effect on the Euro dollar system and the Euro-dollar is what provides liquidity between banks – in other words foreign off-shore banks use lots of dollars or their derivatives and the US has little influence over this (I know this is over simplified but I am no economist). This is what happens when you “print” loads of money (using a keyboard) instead of putting people in jail. You lose control of the system. You create stagflation and bubbles everywhere. I may not be an economist and I may be dumb but even I can see that. The question is whether the smart people knew this would happen? Did they plan this?

Widely Perceived	Eurodollar System
Central bank is central	Credit-based OFFSHORE system
Money multiplier, deposit-based	Reserve-less, currency-less ledger money
Traditional reserve pyramid	Wholesale, interbank; dynamic bank liabilities
Individual economies are closed systems	Globalized economy intricately linked
Gold Exchange (BW) replaced by US\$	Gold Exchange (BW) replaced by Euro\$
Bretton Woods ended in 1971	Transition to eurodollar-based system 1950’s and 1960’s

<sup>2</sup> Alhambra Investments Euro dollar <https://www.alhambrapartners.com/2019/04/22/eurodollar-university-the-overview/>

I believe that some of them did plan this. Others (Central Bankers) did not know but they are waking up now and they realise that they are trapped, and they are terrified. However, as we indicated in an earlier article, this is also linked with the return on energy;

The economy is a surplus energy equation, not a monetary one, and growth in output (and in the global population) since the Industrial Revolution has resulted from the harnessing of ever-greater quantities of energy. But the critical relationship between energy production and the energy cost of extraction is now deteriorating so rapidly that the economy as we have known it for more than two centuries is beginning to unravel.<sup>3</sup>

My opinion (for what it is worth) is that this is engineered because some people knew what was coming. They realised that the earth could not continue with the current rate of consumption and exponential population growth. The solution (according to them) is a reduced global population (especially in Western Countries) and a return to neo-feudalism with a rich and powerful elite who use technology and repression (global warming etc)<sup>4</sup> to control the masses. The greatest control mechanism is the regulation of money because once you digitize the monetary system you control everything.

## Population predictions

One website that draws the attention of conspiracy theorists is called “**deagle**”<sup>5</sup> and it shows a shocking decline in population for countries like the UK, the US and Australia over the next five years (by 2025)<sup>6</sup>. The population percentages from deagle have been plotted (by me) on

<sup>3</sup> Must read: Perfect storm energy, finance and the end of growth, Dr Tim Morgan Global Head of Research Tullett Prebon <http://ftalphaville.ft.com/files/2013/01/Perfect-Storm-LR.pdf>

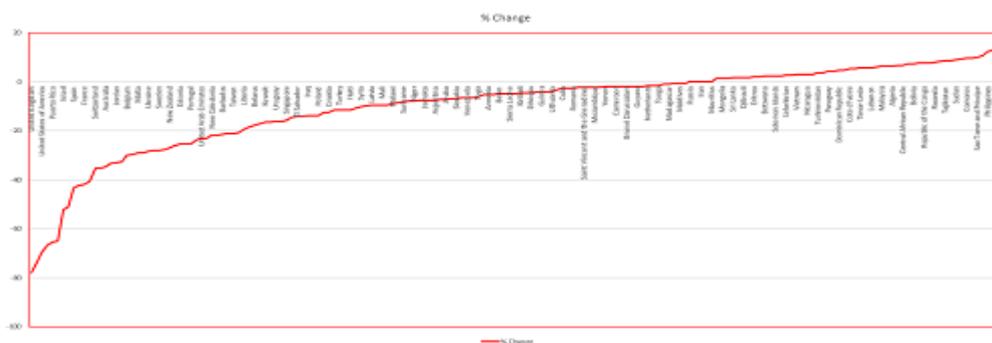

<sup>4</sup> Is it coincidence that the last two major terrorist outrages (NZ and Portland?) were perpetrated by “eco-fascists” that more violent methods (suicide/murder) are being considered by these “environmentalists” and note the name of the (non-violent) protest group; “extinction rebellion” – more fear, more violence –YOU WILL COMPLY. This is obviously driven and organized by NGO’s. Many of the people who protest will of course be totally unaware that they are just “useful idiots”.

<sup>5</sup> I believe that **deagle** stands for the **Desert Eagle**, which is a semi-automatic handgun notable for chambering the largest centrefire cartridge of any magazine-fed, self-loading pistol. The design was refined, and the pistols were manufactured by **Israel Military Industries** until 1995. Gaming "skins" for weapons can be purchased online this weapon appears in two Digital Trips: Conspiracy! and Alone (as the EMP Gun). I have seen pictures of the **Desert Eagle Conspiracy** gaming skin that clearly have “**Made in Israel**” on the side. Using ICAAN will not reveal ownership of the domain name (information restricted):

<sup>6</sup> Is 2025 the terminal date for 5G roll out? (LOL)

an online excel sheet. The UK is the worst with a decline of 80% predicted by 2025 (that is eight out of every ten people dead). The website purports to have calculated the population and GDP figures etc by using UN and CIA statistics. However, there is no way to question these figures as the “modelling” is not explained or available. If (for example) the UK modelling is based on ridiculous “project fear” numbers, then we might expect a huge reduction. So, this may well be a psyop, or head-fake (for want of an expletive) in order to induce fear but equally likely it cannot be discounted that depopulation is the goal of certain global elites. Perhaps we are seeing a sort of “wish list” rather than a prediction? Note that the slack is taken up by the third world as average global population **increases by 10%**. It is only the Western nations that suffer decimation (**even Israel**). What is interesting is that countries next to each other (Germany and Holland) have hugely different numbers. This virtually rules out “nuclear war” or “plague”. It might be that these countries have been specifically targeted for civil unrest and note that all these countries are advanced economies and are therefore at the mercy of the monetary system. It is becoming increasingly apparent that we have competing factions – globalist vs. nationalists or communist vs. neo-capitalist who are using the monetary system to achieve their ends. Either that, or it is **one big head-fake** and they are both on the same side.<sup>7</sup> The USA is a good example of this as the political system has been captured and no matter who is in power the same policies are churned out. What we are seeing here is a “pivot” to Asia as western nations decline. If Israel is targeted along with the West then this is anti-Zionist, anti-Trump propaganda and possibly neo-Marxist (George Soros and crew) internationalists who also want monetary control but despise the Christian West and are willing to sacrifice 50% of the Israelis (the Zionist, Ashkenazi population?). Who knows?

See the link for an enlarged % plot of the population changes.<sup>8</sup> As Rush Limbaugh noted;

“That’s why I take the time breaking down what global government really is. It’s not the way it has been portrayed by conspiracy theories like the Trilateral Commission or the Council on Foreign Relations. It’s

real! It's a bunch of people who believe they are smarter and better than everybody else, who just simply have a mass craving for power and the access to money that that that will give them. They couch it all in improving lives, based on compassion and an attempt to establish a utopia".<sup>9</sup>

## A bull in a China Shop

Trump is acting like a bull in a China shop. It seems that China has outlived her usefulness and Poo-bear will no longer be emperor for life. This is very interesting because it shows clearly how the head-fake has been done.

- First you open-up China (Nixon-Kissinger)<sup>10</sup>
- Then you export all the jobs and manufacturing to China
- Then you import loads of cheap crap made in China
- Then you extend credit and increase debt to distract your unemployed people and stagnant economy and give them the illusion of wealth by increasing house prices which is really a function of the dollar (and all fiat currencies) losing value through money printing.
- Then you collapse the Chinese economy on the pretext of "getting the jobs back" (they will go elsewhere anyway e.g. Vietnam).
- Then you collapse the global economy to wipe out the dollar debt and introduce a new currency

As one online joker puts it:

**Xi say** "I show you Trump, I devalue my worthless currency, so we sell cheaper still while paying your tariffs"

**Xi slave say** "oh no master, oil costs more and so do soybeans and pork and--everything we need to survive"

**Xi say** " use our dollar reserves to buy more oil and food"

**Xi slave say** "oh no master, we have run out of dollars--now yuan worth even less"

**Xi say** "tell them 'belt and road'--just keep saying 'belt and road'"

**Xi slave say** "Master, even Africans want dollars, no want yuan. Say they cannot buy Cadillac's and Mercedes with yuan"

**Xi say** "oh \*\*\*\*"

<sup>9</sup> <https://www.rushlimbaugh.com/daily/2019/08/19/conspiracy-theories-no-just-explaining-liberalism/>

<sup>10</sup> Nobody could trade with China until 1972 due to US sanctions, then because the US economy was failing Nixon went to China and did a deal to save the American economy.

This is indeed funny and probably a good summary of the situation, however, it is not so funny once you realise that many innocent Chinese will suffer and die.<sup>11</sup> China will experience internal strife that will be put down violently and no matter how oppressive the Chinese government is, ordinary people do not deserve this. The West has behaved woefully towards the Chinese people – first acting as drug dealers (the opium wars) and then seducing them with fake capitalism (the hopium war) before destroying them. If you really want to know what is happening with Hong Kong read the following excellent article:

### **Hong Kong – The Battleground for the Hegemony of Dollar**

<http://viewsandpreviews.com/hong-kong-the-battleground-for-the-hegemony-of-dollar/>

This is all about the dollar maintaining the status of global “reserve” currency. Trump has ordered all US businesses to come home and is tightening the China screws. However, Trump is not the only one playing games as there are others out there **who no longer want the dollar at all**. The dollar has lost nearly all its value because of QE (money printing) and this has been done on purpose. It looks like the yuan will not be the “next” global currency as Carney himself observes;

And the most likely candidate for true reserve currency status, the Renminbi (RMB), has a long way to go before it is ready to assume the mantle. **And the Renminbi is now more common than sterling in oil future benchmarks, despite having no share in the market prior to 2018.** [p.13]

This exactly what the article above (about Hong Kong) says. Dollar hegemony is threatened by the yuan (Renminbi).<sup>12</sup> Therefore, China must be destroyed. However, the dollar is virtually unsalvageable. The only thing that may help dollar hegemony is a war. As Carney remarks;

<sup>11</sup> China loses five million jobs in trade war

Just Like Dominoes: There Are Many More Banks at Risk Of Failing In China

<https://speculatorsanonymous.com/articles/china-bank-failing/>

<sup>12</sup> There is essentially no **difference**. The **renminbi** is the official currency of the People's Republic of China, and translates to “people's money.” Its international symbol is CNY (or CNH in Hong Kong; but abbreviated RMB, with the symbol ¥).

Past instances of very low rates have tended to coincide with **high risk events such as wars**, financial crises, and breaks in the monetary regime. [p.8]

One comment (from another conspiracy theorist LOL) has a very interesting insight:

The new Chinese-created AC Chain crypto currency blockchain will be the **SDR-related world currency**<sup>13</sup> that will allow the international banking elite to digitize every tangible asset on earth, and they will then exert total control over all of it. Lynette Zang explains: "The goal is to capture your wealth, and when they say this is the LAST wealth transfer mechanism, they mean it because they want it all. All of it." Intel Software designer Brad Peters takes it one step further, saying: "If a global crypto coin controlled by the Bank for International Settlements (BIS) comes to internationalize PROPERTY onto their crypto blockchain, they get their one world government and one world currency all in the same stroke. This IS your 1988 (2018 prediction) Economist magazine cover."<sup>14</sup> Yes, this guy thinks they are going to chip us as well.<sup>15</sup> Last September I wrote an article pondering the possibility that cryptocurrencies and blockchain may serve as a red herring gateway to a global 5G-driven electronic implantable currency controlled by the same Rothschild-led central bankers who control all other global monetary assets ...the list of the cryptocurrency and blockchain companies which DCG owns is truly staggering. It appears that the Bitcoin cult has been duped by none other than the Rothschild/Rockefeller-controlled New York Fed, which appears to be driving the blockchain train. That probably explains why nearly all Bitcoin "mining" has moved to China. And why David Rockefeller's social credit-based "China model" is leading to way towards global enslavement one block and chain at a time.

Of course, this is all **tin-foil-hat stuff**. Put on the straight-jacket and cart this imbecilic moron away. **Until you read what Carney says:**

When change comes, it shouldn't be to swap one currency hegemon for another. Any unipolar system is unsuited to a multi-polar world. We would do well to think through every opportunity, including those **presented by new technologies**, to create a more balanced and effective system. [p.5]

<sup>13</sup> The *SDR* (Special Drawing Rights) is an international reserve asset, created by the *IMF* in 1969 to supplement its member countries' official reserves. ... The value of the *SDR* is based on a basket of five currencies—the U.S. dollar, the euro, the Chinese renminbi, the Japanese yen, and the British pound sterling.

<sup>15</sup> <https://hendersonlefthook.wordpress.com/2019/04/09/the-feds-5g-blockchain-enslavement-plan/>

So, not only will 5G give you faster access to porn and violence, it will track and enslave you to a crypto currency and it has the added benefit of **antennae sickness** that will fry your brain. **The whole solution in one easy package** – turn the population into brain dead autistic cancer ridden zombies and expedite the depopulation agenda. Perhaps you will need the tin-foil hat after all. It seems that **the more balanced effective system** does not necessarily require your participation (LOL).<sup>16</sup>

## Death Throes

What you are seeing are the death throes of the dollar. Can the “**chosen one**” save the US empire and MAGA? Probably not. But by the time they are finished both China, Iran and the USA will be devastated. I expect a new entity to emerge “Phoenix like” from the ashes of the Middle East.<sup>17</sup> Whatever emerges they have already had a practice run on the technologies in China and they know that they work (Social Credit Scores and facial recognition). They will be omnipotent (all powerful through their crypto currency) and omniscient (through their psychoanalysis and social prediction algo’s) and omnipresent (through their surveillance).

**They will be your new gods and you will love it.** They will control what you buy or sell. You want a New Testament? Suddenly your account no longer works. Criticize dear leader? Suddenly you cannot purchase food for a week. You think I am exaggerating.... the new system will capture everyone, and it is called..... ta da..... **freedom** (Libra)<sup>18</sup> In the words of Carney;

While the likelihood of a multipolar IMFS (International Monetary and Finance System) might seem distant at present, technological developments provide the potential for such a world to emerge. Such a platform would be based on the virtual rather than the physical. **The most high profile of these has been Libra** – a new payments infrastructure based on an international stablecoin fully backed by reserve assets in a basket of currencies including the US dollar, the euro, and sterling.

<sup>16</sup> 2019 is likely to be the year of 5G rollout around the world. Did anyone ask you about 5G? There are lots of problems surrounding 5G and you will not be able to avoid the antennae’s whether you have a phone or not. The roll out of 5G that is authorized by the FCC, in conjunction with other U.S. agencies (DoD, CIA, FBI, etc.), is another experiment in the weaponization of the internet and all digital technologies that surround it, including the use of cell phones, wireless broadcasting, wireless computers, and the 100 billion wireless devices that will be connected to the Internet of Things in the next few years. Please read and do your research: Antenna Sickness is Everywhere Now [Posted on Sunday, February 5, 2017] <https://manhattanneighbors.org/antenna-sickness/>

<sup>17</sup> Remember the 1988 cover of the Rothschild owned Economist Magazine predicting a “one wold currency” called the “Phoenix coin”?

<sup>18</sup> The name comes from the Roman unit of weight. It’s also an attempt to evoke a sense of freedom by using the French-derived “lib,” meaning free. The Latin word *libra* was “balance” or “scales,” and this is where the astrological sign gets its name. Justice, balance, and peace. Not exactly what comes to mind when you think of a cryptocurrency. Anything to do with the Zodiac Sign?

<https://www.refinery29.com/en-us/2019/06/235755/facebook-libra-cryptocurrency-astrology>

It could be exchanged between users on messaging platforms and with participating retailers. There are a host of fundamental issues that Libra must address, ranging from privacy to AML/CFT and operational resilience. In addition, depending on its design, it could have substantial implications for both monetary and financial stability.

The Bank of England and other regulators have been clear that unlike in social media, for which standards and regulations are only now being developed after the technologies have been adopted by billions of users, the terms of engagement for any new systemic private payments system must be in force well in advance of any launch.

As a consequence, it is an open question whether such a new Synthetic Hegemonic Currency (SHC) would be best provided by the public sector, perhaps through a network of central bank digital currencies. [p.14]

## Meet Dear Leader

I believe that they are just **trolling the public**. Even the elite are not stupid enough to put Zuckerberg in charge. This is just a trial-balloon that will make any alternative look like a sane and reasonable choice. They are truly evil and completely insane. I am starting to believe that David Icke was correct – they are shape shifting reptiles. These are the “partner” companies that back Libra (now you know your enemy):

This is Hegelian Dialectic writ large, namely a thesis or statement of an idea, which gives rise to a second step, a reaction or antithesis that contradicts or negates the thesis, and third, the synthesis, a statement through which the differences between the two points are resolved. We might say the thesis is open borders globalism, the anti-thesis closed borders nationalism with the synthesis being ...centralized Jewish world rule. And this is how it will end **but it will be Jesus Christ in charge** and the evil money lenders (merchants), *and the beast worshipers will all be killed.*
